

Introduction to Photography

The great thing about photography today is that so many of us have access to it!

Whether you have a real camera or just one of the great ones that come with our phones and tablets, it is not hard to learn how to take awesome photos!

If you're interested in practicing your own photography skills, there are many types of photography to choose from! For example:

- Portrait photography
- Landscape photography
- Animal photography
- Food photography
- Motion photography
- Night photography

Some types of photography are much harder to master than others, so if you do not like your photos at first, don't give up! For some, the fun in photography comes from taking the photos. For others, it's in editing the photos!

Here are some great apps you can use to start editing your photos:

- SnapSeed
- Afterlight (2)
- Adobe Lightroom (available both on the computer and on your phone)

There are also many free photo-editing apps in the app stores, so keep exploring!

Be sure to share with us your creation by using the hashtag #GirlScoutsAtHome, #GSArtShow and tagging us @gswcf on TikTok, Instagram, or Facebook!
